

**SEIZMIK**

Lots of Polaris Ranger customers already have a hard roof and windshield,  
but after they've had the vehicle for a while  
they realize they want a **full** cab.

These Doors will work with **ANY** hard roof, **ANY** windshield, and **ANY** back panel.

**No other set of doors has this flexibility. At any price.**

They'll work with whatever parts your customer already has, saving them the cost of replacing those parts.

**SEIZMIK**

The doors have a frame made of .75" diameter steel tubing, and they're covered with heavy duty water and UV resistant fabric.

Tensioning straps keep the door frames tight and prevent flapping. The clever design works with any roof, windshield, or back panel.
